

SFM-03 – Practical Session Basic Statistics using Excel

Key Takeaways

- Understanding how to create portfolios and optimize them
- Working with Monte Carlo simulations and calculating VaR
- Creating Bollinger Bands

Pre-requisites:

- Read: [Portfolio Optimization Using Monte Carlo Simulation](#)
- Read: [Introduction To Monte Carlo Analysis](#)
- Read: [Beginner's Guide to Statistics and Probability Distribution](#)
- SFM-01 and SFM-02 Lecture Recording
- Completion of SFM-01-Assignment & SFM-02-Test would help in better understanding of the lecture.

Downloadable Files

- One folder is available for download: “SFM03-Inclass Exercises File.zip” Please download it prior to the lecture.

Recommended time for the session & related coursework - 8 hours
