

Setup Guide: OpenAI and Make.com Integration

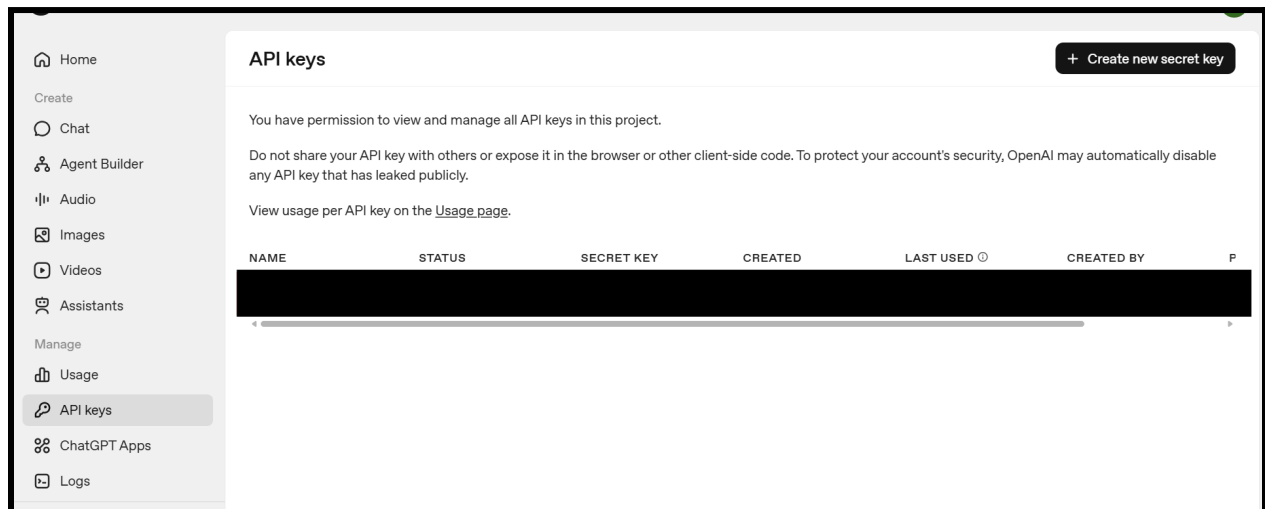

What is this?

This guide provides a walkthrough for setting up your OpenAI and Make.com integration. By following these steps, you will connect a multi-agent research workflow, designed to move from a strategy idea to a completed Jupyter Notebook, with the necessary API keys and cloud storage accounts.

OPENAI setup

How to create an OpenAI API key?

1. Go to <https://platform.openai.com/home>
2. Create an account/login
3. Click on **“API keys”** in the left panel
4. Click on **“Create new secret key.”**

5. Give the key a name and create the key

Create new secret key

Name Optional

my test key |

Project

EPAT Query Agent

Permissions

AllRestrictedRead only

CancelCreate secret key

6. Copy and save the key

Save your key

Please save your secret key in a safe place since **you won't be able to view it again**. Keep it secure, as anyone with your API key can make requests on your behalf. If you do lose it, you'll need to generate a new one.

Read and write API resources

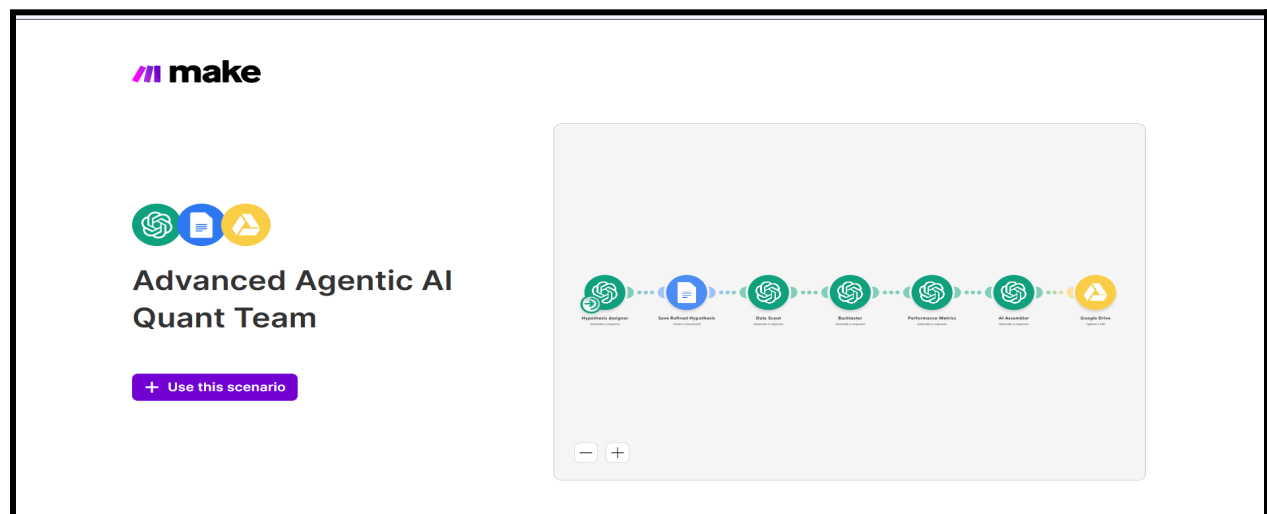

Done

Make.com setup

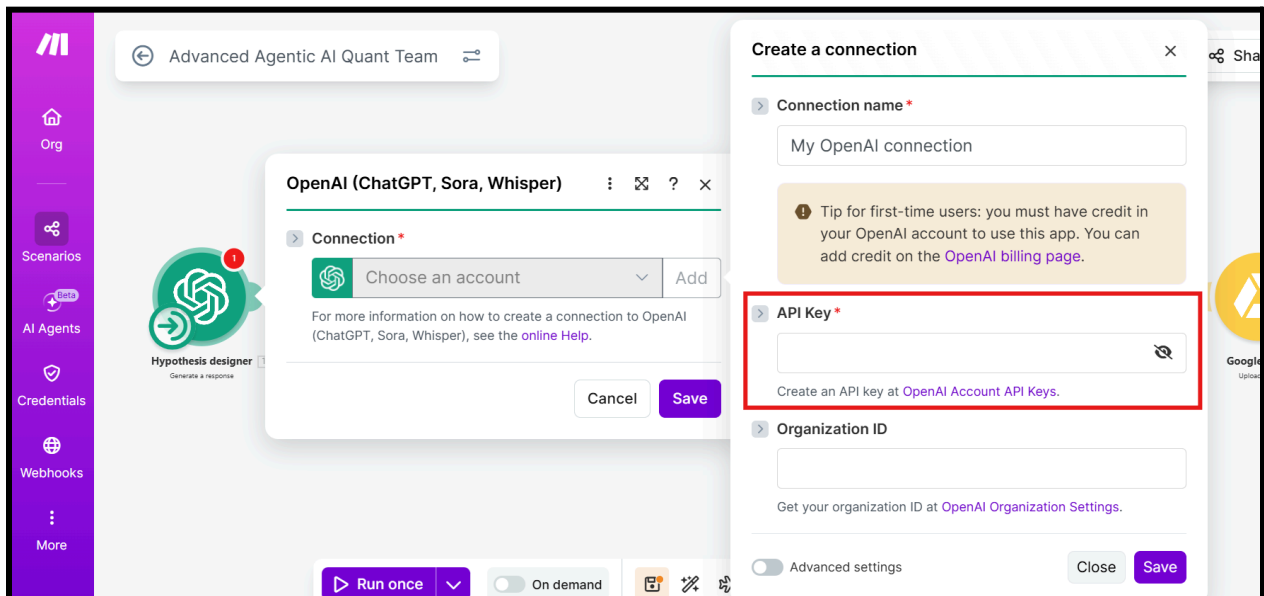

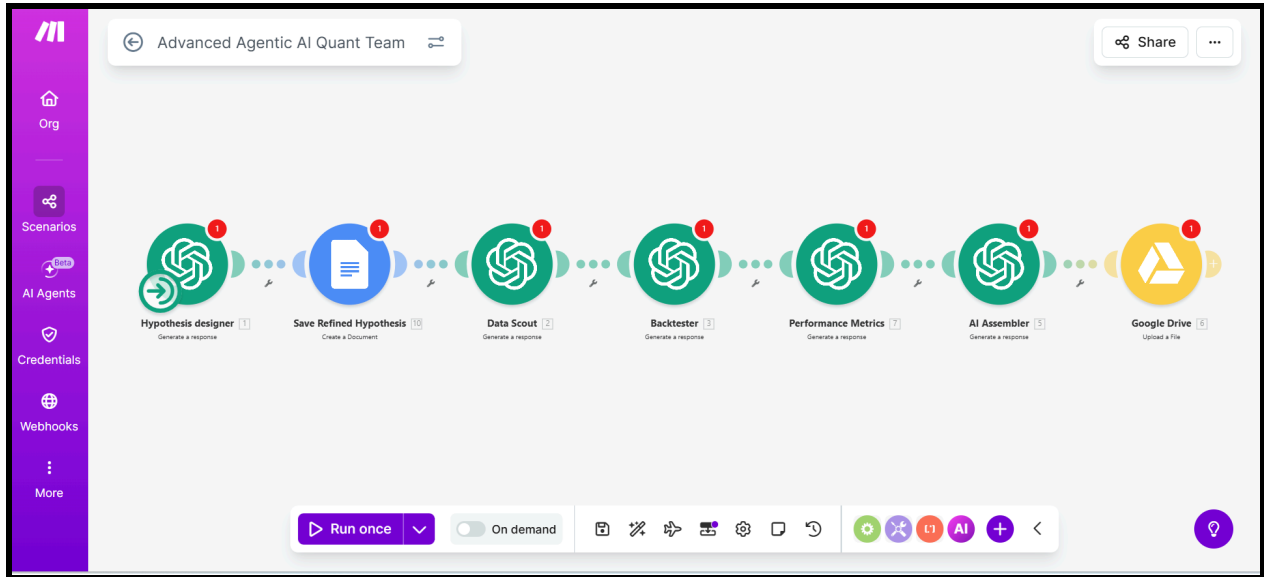

1. Log in to your LMS, click on TBP module -> Section 8 -> Supplementary lecture 2 -> Multi Agent Workflow Prompt.
2. Click on “View [make.com](#) scenario”

3. Then click on “Use this scenario”

4. Click on “Hypothesis designer”, click on “Add” under “Connection”. Use the OpenAI API key created previously and plug in below:

5. Click on “**Save Refined Hypothesis**”, click on “Add” under “Connection,” and sign in with your Google account.

Create a connection

> Connection name *

My Google connection

 Make's use and transfer of information received from Google APIs to any other app will adhere to [Google API Services User Data Policy](#).

☐ Advanced settings

Close

 Sign in with Google

6. For **“Data Scout”**, **“Backtester”**, **“Performance Metrics”**, and **“AI assembler”**, add the connection created previously.
7. For Google Drive, add the Google account created in step 4. Create a folder in your Google Drive(eg, quant_strategies) to save the generated files.
