

TBP03: Lecture Objectives & Prerequisites

Overview

In this session, the faculty will take you through the basics of using the Blueshift platform. This will include a very short introduction to the workflow on the platform, the use of the platform API and creating complete example strategies.

Key Takeaways

- Strategy flow in Blueshift
- Create a strategy on the Blueshift platform
- Back-test the strategy on the platform
- Manage your portfolio in Blueshift
- Demo strategies for back testing

Pre-requisites

- Familiarity with Python required.
- Sign up on Blueshift (<https://blueshift.quantinsti.com/>)

Practical use of the topics learnt in this session

- Backtesting approaches and cautions
- Create a strategy on the Blueshift platform
- Back-test the strategy on the platform
- Manage your portfolio in Blueshift
- Demo strategies for backtesting
