

Cloud Computing

Jay Parmar

Agenda

- 1) Components of a Server
- 2) Issues with Traditional Setup
- 3) Overview of Cloud Computing

What's Next?

- Deployment of an algorithm
 - Setup a trading server in-house
 - Setup a trading server on cloud

Components of a Server

- Operating system
- Random Access Memory (RAM)
- Storage media
- Databases
- Network connectivity
- Trading softwares

Issues with Traditional Setup

- Pay for electricity, cooling and maintenance
- Adding and replacing hardware takes time
- Scaling is limited
- Might need to hire someone to monitor the infrastructure
- Dealing with disasters becomes difficult (natural calamities, power shutdown, fire, etc.)

- Modern day approach: Cloud Computing
 - What it is?
- Benefits of using cloud computing
 - Scalability
 - Cost-effectiveness
 - Elasticity
 - High availability
- Demo on AWS

- Questions, if any!
